

*The matter of **School Apps for Homework** can be complicated. Here, we try to simplify it.*

School websites are really important for communicating your school's overall vision and values to parents of prospective students, allowing them to get a really good overview of who you are and what you do. If there are key subjects or areas your school specialises in then your school website is a great place to highlight these and show off your results and expertise. For any school you're interested in, you should check to see if they have an app you can put on your device of choice, even if all you're doing is visiting. Using different platforms for different communications and channels will result in extra workload and likely communication breakage and disruption. It could confuse parents and cause them to miss important notices and updates. Parent involvement in school and the positive effect it has on student achievement are significant. Henderson and Mapp offer a synthesis of research studies that consistently demonstrates that, regardless of income or ethnic group, students with involved parents perform better in school and are more likely to achieve their goals. Thanks to the internet, schools no longer have to spend money each year on new textbooks. Information is readily available online, and it's more up-to-date than with old print books. Data from instructional assessments can give teachers and leaders powerful information that results in better, more targeted teaching and learning. But wouldn't parents benefit from learning about students' strengths and areas of development, too?

Communication is key today. We all have busy lives, so providing parents and carers with instant access to school information on the device they're using everyday, is now the best way to engage them. In many instances, this can also benefit students, staff, governors and other stakeholders. If a school uses a dedicated app to record pupils' achievements in the classroom that then allows them to share that success with parents, even if the parent simply replies, 'That's great!', then the door to greater engagement has been opened. The skills that schools often value are those that many youth at risk

for under achievement do not possess. Help students learn what their intelligence profiles are. Deliver curriculum in ways that provide opportunities for kids to excel in their dominant learning style. With a school app, all of your parent communications are in one place rather than the mixed channels which most schools end up using. This means it's easier for you to keep track of what's going on because all of your school communications with parents are in one convenient app. Schools using [Online School Payments](#) can go paperless internally and with parents too.

Report On Your Performance

With patience and consistent follow-through, positive results should begin to show. Sometimes this written agreement is what it takes to get a real and lasting commitment from a reluctant learner. The process of learning is changing with each new generation. Today's children need a contemporary approach that relies on much more than the usage of textbooks. This kind of library can become the most valuable educational resource that your school possesses. With an increase in educational technology-based solution providers, families are increasingly becoming involved in their children's education. Schools can read parents' replies and see when messages have been picked up with a school mobile app. In order to make decisions in the best interest of students, educators must proactively gather and use data to continually know and respond to their students' needs. This is a collective effort that informs the effectiveness of teaching practices, overall student achievement, and general well-being of students. Schools that use products like [Homework App](#) have an advantage over other schools.

At times homework can be a source of contention between parents and kids. Schools can help reduce the tension related to homework by providing parents with important information. Some schools have programs such as a homework hotline, which allows parents or students to call in and receive a recorded message about the daily homework assignment. A key challenge for researchers working in these social contexts is to find ways of capturing relevant data without oversimplifying, bearing in mind how intricate, typically, are the dynamics of family or classroom and interactions between the two. In these challenging times, knowledge is important for targeted action. Having access to updated data on students can help educators ensure fewer children drop out of school, and arm decision-makers with what's needed to address inequities in access to learning and supportive services. Parents like to know what's going on in the classroom. Teachers can now use data tools to show parents where their students excel and where they need improvement. Using modern data tools, teachers can get this information to parents much faster, as opposed to waiting until the end of the quarter when it's often too late. While laws apply to what schools and third parties can disclose about students, they do not apply to what students or their parents might disclose publicly, which means you and your child also have a responsibility to protect your child's privacy. Schools can now consolidate [Parents Evening System](#) and all other systems into one application.

Built For Education

The thrill-oriented learners can't acquire goals, relationships, or curiosity, but if any of these feel too time-consuming, invasive, or binding, the learner becomes rest-less and perhaps experiences a compulsion to go in another direction—any other direction—to feel free. If a child has been given detention, parents will be notified within the school app, all helping enhance the communication between the parents and your school. A school app can bring parents and schools closer, opening channels of communication with home and offering a space to purchase supplies, pay for trips, book onto clubs and give consent at the click of a button. Schools and teachers play an essential role in making parents or caretakers as involved in their children's learning as possible, but they themselves can also take matters into their own hands if they truly want it. Either way, education technology is here to help. If a school is using different systems to manage behaviour, assessments, attendance, HR and communications, it's also difficult to get a clear overview of what's happening across your school, or Multi-Academy Trust. Schools that consolidate [Websites For Schools](#) into one simple to use platform can ease their administrative burden.

With a school app, parents no longer have to rely on their organisation as there's no paperwork to worry about, no letters or consent forms they have to sign and share with the school. A school app helps schools foster a feedback environment. Helping you build sustainable comms strategies for both current and prospective parents. Schools with a strong commitment to pupil voice have reported many positive outcomes. These include a reduction in exclusions, better behaviour, better relationships across the whole-school community, and improving attainment and attendance – all of which can also improve your school's rating by the school inspectorate.
